

## GeoPro™ and Iridium®

GeoPro LBS Inc. is a value added manufacturer (VAM) of Iridium, and a value added reseller (VAR) of Iridium short burst data (SBD) services. The GeoPro™ solution is comprised of GeoPro Messenger, a rugged satellite text messaging device with integrated GPS, and a secure hosted web application. The GeoPro *Messenger* device uses an embedded Iridium 9601 SBD modem for over the air (OTA) communication with the Iridium satellite SBD network, and to enable two-way global messaging between GeoPro Messenger users and other email, mobile phone or GeoPro users.

GeoPro is a member of the ProTECTS Alliance (Promotion of Iwo-way Emergency Communication and Tracking Systems).

### About The ProTECTS Alliance

The ProTECTs Alliance was formed in September 2009 to facilitate rapid and orderly adoption of portable two-way satellite data solutions for improved tracking, messaging and emergency communications. The ProTECTS Alliance is an advocate for industry standards based on two-way satellite data links.

The Alliance seeks to foster the development and deployment of bi-directional satellite data solutions meeting the requirements of the growing population of government and business organizations using portable tracking devices, as well as the public-safety community.
